

Visit to Northern Heritage Engineering at Darlington on Thursday 19th June 25:

This visit was of particular interest to steam enthusiasts; Northern Heritage Engineering is a specialist engineering company working on restoration and manufacturing of steam and traction engines. The visit was prompted by an interest in the 1863 Mountaineer project which is the construction of a replica tank locomotive named 'Mountaineer' which was first built for the Ffestiniog Railway in 1863. Progress on the project was presented including the wheels and axles, completion work on the boiler as well as a showcase of other projects and machinery.
